

Poplar trees along the Tambo River will be removed by this Friday, September 25. (PS)

## Tambo poplar removal

**East Gippsland Catchment Management Authority (EGCMA) contractors have started the mechanical removal of poplars along the Tambo River below the Swan Reach bridge.**

The unnamed road along the west bank of the river will be closed while machinery is in operation.

EGCMA apologises for any inconvenience this may cause.

The poplar debris will be removed from the riverbank and burnt. Smoke may be visible in Swan Reach during this time. These works are expected to be completed by September 25 and the road reopened.

A map showing the location of the road clo-

sure, and further information about these works, is available on the EGCMA website.
